

MUHAMMAD MATEEN

WEB DEVELOPER

meetmuhammadmateen@gmail.com | +92 325 7312012 | github.com/meet-muhammad-mateen | linkedin.com/in/muhammadmateen112 | mmateenn.netlify.app

PROFESSIONAL SUMMARY

Web developer building responsive, production quality interfaces with React, JavaScript, and Tailwind CSS. Led a full company website redesign end to end and independently shipped seven deployed web projects, from a full stack college portal to data driven dashboards, e commerce, and restaurant sites. Skilled in component architecture, mobile first layout, and turning designs into fast, maintainable code, with additional working knowledge of Next.js, TypeScript, Python, Django, REST APIs, and AI/LLM integration through the OpenAI API, Google Gemini, and xAI Grok.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript, Python

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Vite, Responsive Web Design, Mobile First Development, Component Architecture

Backend and APIs: Django, REST APIs, SQLite, Axios, Authentication Systems, Database Integration

AI Integration: OpenAI API, Google Gemini API, xAI Grok, AI/LLM Integration, Prompt Driven Applications, AI Assisted Development

Tools: Git, GitHub, Netlify, Vercel, VS Code, Figma, Chrome DevTools, npm, pnpm

Engineering Practices: Cross Browser Compatibility, Performance Optimization, SEO Fundamentals, Web Accessibility (WCAG), UI/UX Implementation, Debugging, Deployment

PROFESSIONAL EXPERIENCE

Web Developer Intern, After Concept

March 2026 to Present

- Led the end to end redesign of the company's official website, taking it from a legacy layout to a modern, responsive interface using HTML, CSS, JavaScript, and Tailwind CSS.
- Architected a reusable component and navigation system that cut duplicate markup across pages and made future updates faster to ship.
- Built every layout mobile first, giving the site consistent behavior from small phones through desktop breakpoints.
- Owned deployment and release updates on Netlify, coordinating changes directly with the team.

SELECTED PROJECTS

College Digital Hub

Next.js, React, TypeScript, FastAPI, Django, Supabase, Tailwind CSS | apsac-nmc-bwp.vercel.app

- Built a full stack college portal covering student login, student records, class schedule, and announcements, with a Next.js and React frontend in TypeScript styled with Tailwind CSS.
- Implemented backend services and data handling across FastAPI, Django, and Supabase, connecting authentication and records to the portal interface.

LandDesign Intelligence Dashboard

Data Analytics Web App | 54.162.190.58

- Built a portfolio analytics dashboard tracking real estate development activity across Alexandria, City of Fairfax, Loudoun County, and Washington DC.
- Designed cross city analytics with interactive charts for pipeline trends and service type heatmaps, plus a data export tool for reporting.

After Concept, Company Website Redesign

HTML, CSS, JavaScript, Tailwind CSS | www.afterconcept.io

- Rebuilt the company site as a component driven, responsive interface, replacing hard coded sections with reusable Tailwind CSS blocks.
- Restructured page layouts for mobile first rendering and cleaner accessibility across all screen sizes.

Bookshelf Online

HTML, CSS, JavaScript | bookshelfonline.netlify.app

- Built an online bookstore interface with responsive product grids and streamlined navigation, prioritizing clarity and load speed.

Lahore Gates Café

HTML5, CSS3, JavaScript, React | lahoregatescafe.netlify.app

- Built a fully responsive café website in React with dedicated menu and gallery sections designed around real user flow.
- Tuned layouts individually for mobile, tablet, and desktop rather than relying on a single breakpoint set.

Gossip Café

HTML, CSS, JavaScript | gossipcafe.netlify.app

- Built a restaurant website with an interactive homepage and menu system driven by custom JavaScript.
- Refined layout and interaction details separately for mobile and desktop use cases.

Snack Spot

HTML, CSS, JavaScript | snackspot.netlify.app

- Built and deployed a landing page for a food brand using reusable UI sections, verified for cross browser consistency, live on Netlify.

EDUCATION

Intermediate in Computer Science (ICS), Army Public School & College System

Expected 2027

Matriculation (Computer Science), Army Public School & College System
